ABOUT US

At MeiRai Medical Aesthetics (meirai.com), Roseburg's premier medspa, we live for those magical "future beauty" moments—our name MeiRai (美來) literally means just that in Korean: your most radiant, confident, jaw-dropping self is on the way! We're all about natural, timeless results that make you feel unstoppable on your big day: dazzling, photo-ready skin with HydraFacial, microneedling, BBL + Halo, and CO2 Lift Pro; smooth, youthful features with Botox, lip filler, Sculptra, and Agnes Ultra; silky-smooth body confidence from laser hair removal, EmSculpt Neo, EmSella, and Tirzepatide; plus that final sparkle with teeth whitening, lush lashes & brows + Latisse, and medical-grade skincare to keep the glow going.

MeiRai will have the entire bridal party (and the mamas!) wedding ready:
Luminous Skin . Refined Features . Body Confidence . Finishing Touches

THE BLUSHING BRIDE GLOW-UP

Your journey to radiant confidence

As your big day approaches, every bride & groom deserves to feel flawless from head to toe. At MeiRai Medical Aesthetics, we're here to guide you through personalized treatments that enhance your natural beauty. Learn about our top services, from skin rejuvenation to body sculpting, tailored for your wedding prep. Let's make your "I DO" moment unforgettable!

MeiRai's radiant results are based on the foundation of Dr. Yun's Trifecta:

1. Medical Grade Skincare regimen: nightly retinol + daily SPF to build and protect skin health
2. Sculptra to boost collagen and glow from the inside out
3. Laser treatments to improve tone, texture, boost collagen and preserve youthfulness

achieving that bridal radiance

SKIN DEEP

Building a flawless, luminous foundation for your wedding-day glow: deeply hydrated, even-toned, smooth-textured skin with reduced imperfections and that coveted dewy, healthy radiance that photographs beautifully.

MeiRai starts every bridal plan with the cornerstone of Dr. Yun's Trifecta as the essential foundation for lasting, healthy skin:

Medical-grade skincare regimen — nightly retinol to promote cell turnover and collagen production + daily broad-spectrum SPF to protect against damage and preserve youthfulness (start immediately, continue daily as the base for all results).

Layer in these additional targeted treatments to elevate your bridal radiance:

- Botox/Dysport — relaxes dynamic wrinkles (forehead, crow's feet, frown lines) for a smoother, refreshed, and rested appearance (every 3-4 months, with final wedding day session 2-4 weeks before the event).
- HydraFacial — deeply cleanses, exfoliates, extracts impurities, hydrates, and infuses powerful antioxidants and peptides for instant plumpness and glow (monthly maintenance recommended; final session 1 week before the event).
- Microneedling — creates controlled micro-channels to stimulate collagen and elastin, refining texture, minimizing pores, and improving firmness and resilience (series of 3-4 sessions every 4-6 weeks; start 6-9 months out).
- CO2 Lift Pro — innovative, non-invasive CO2-infused mask that oxygenates, deeply hydrates, and provides an immediate lifting and plumping effect for ultra-dewy, camera-ready skin (1-3 sessions; best 1-2 weeks before the event).

These synergistic treatments create resilient, glowing skin that holds up through the entire wedding day and beyond. Your personalized Skin Deep plan is tailored during consultation to your timeline, skin concerns, and goals. Book at meirai.com to begin.

For the ultimate radiance, include the other two components of the Trifecta: Laser & Sculptra...

- Dr. Yun's Posh & Polished Lite Laser or Fresh Face Formula: HALO + BBL — targets pigmentation, redness, and uneven texture for brighter, smoother, more youthful skin (minimum 1 session ASAP, up to 3 BBL spaced 4-6 weeks; ideally completed 4-6 months out).
- Sculptra — gradual collagen builder restores volume, lifts contours, and improves skin quality (number of treatments varies; consult with Dr. Yun; begin 6+ months out).

SCULPT & SHINE

*Define your features for the Spotlight
... & the Honeymoon*

Refine face and body contours for balanced, toned elegance.

- Medically managed weight loss (Tirzepatide or semaglutide) — supervised program with Nurse or Dr. Yun to slim and trim overall; start with consult for personalized dosing (ongoing weekly; begin 3–6+ months out).
- Agnes Ultra — precision radiofrequency microneedling targets and sculpts jawline, neck, abdomen, or bra spillover fat for sharper definition and reduced small fat pockets (1–3 sessions every 4–6 weeks; start 3–6 months out)
- EmSculpt Neo — non-invasive HIFEM+RF technology burns fat (up to 30% reduction) while building muscle (up to 25% increase) for toned arms, flanks, thighs, glutes, abdomen, and core-to-floor strength (recommended series of 4 sessions spaced 5–7 days apart; start 2–3 months out for visible results).
- Exion Body + Exion Fractional RF Microneedling — advanced RF microneedling tightens skin, boosts collagen/elastin, improves texture, and addresses laxity on body areas (series of 3–6 sessions spaced 4–6 weeks; layer mid-timeline after EmSculpt Neo for enhanced firmness).
- EmSella — non-invasive HIFEM chair treatment strengthens pelvic floor muscles to improve core stability, bladder control, and sexual function/enhanced pleasure (recommended series of 6 sessions over 3 weeks, 2–3 per week; start 1–3 months out).

ALL EYES ON YOU

EFFORTLESS ELEGANCE WITH LASER HAIR REMOVAL PLUS LIPS, LASHES, BROWS, & SMILES THAT DAZZLE

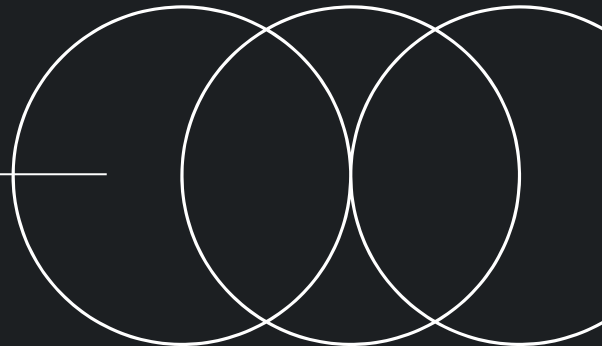

for smooth, framed, bright confidence

Aaaahhh yes... The finishing details that turn heads and light up every photograph—silky-smooth skin from head to toe, perfectly framed eyes, a brilliant smile, and subtle enhancements that bring out your most confident, radiant self for the wedding day and beyond.

- Laser hair removal — advanced, precise laser technology safely reduces unwanted hair for long-term smoothness on face, body, bikini, underarms, legs, or any area (6–8 sessions every 4–6 weeks; begin 8–12 months out for optimal, lasting results).
- Facial and body waxing — professional, gentle waxing provides immediate hair removal and refined skin texture; perfect for quick touch-ups or areas not ideal for laser (single sessions as needed; schedule maximum 1–2 weeks before the event, with maintenance every 4–6 weeks if desired).
- Lashes/brows enhancements + Latisse — Latisse prescription serum grows longer, thicker, darker natural lashes over time; professional tinting, lifting, lamination, or extensions beautifully frame and define eyes (Latisse nightly start 8–12 weeks out; lash/brow services 2–4 weeks before).
- Teeth whitening — professional in-office bleaching safely removes surface stains and brightens your smile for confident, camera-ready grins (1–3 sessions; schedule 2–4 weeks before the event).
- Lip & cheek filler — strategically placed hyaluronic acid adds subtle volume, definition, symmetry, and a natural flush to lips and cheeks for balanced, youthful harmony (1 session, possible touch-up; 4–6 weeks before to allow full settling).

These refined touches ensure every close-up, kiss, and celebration moment reflects your effortless polish and inner glow. Your personalized plan is tailored during consultation to match your timeline and vision. Book at meirai.com to begin. 8
